When coupled with proper nutrition ie vitamins, minerals, and trace minerals, agents to enhance glandular function, and other aspects of wellness programs, nano policosanol can repair and optimize body regulatory processes including DNA.

It can super charge one's health in both chronic and acute conditions, both internally and externally, in remarkable ways.

NANO POLICOSANOL UPREGULATES THE BODY.

WHAT IS NANO POLICOSANOL?

Ninety percent of our cells are viruses and other microbes. This fact has so far been ignored by the Pharma and Medical establishment. The consequences are that mankind still suffers from diseases. This is what NANO POLICOSANOL seeks to address. Our genes make their day-to-day decisions based on chemical information they receive from the food we eat, information encoded in our food and carried from that food item's original source, a microenvironment of land or sea. In that sense, NANO POLICOSANOL is less like a fuel and more like a language conveying information.

What is most fascinating, is the intelligence of the system. It seems our genes have found ways to take notes, to remind themselves what to do

with the various nutrients they are fed. Through mechanisms not fully understood, DNA has been programmed at some point in the past by epigenetic markers that can turn certain DNA portions on or off in response to certain nutrients. (NANO POLICOSANOL is one of them)

NANO POLICOSANOL is Retraining the Forgetful Genome:

The entire programming system is designed for change; these markers can, apparently, fall off, causing the genetic brain to forget, at least temporarily, previously programmed information. This forgotten information can be recalled, given the right environment. This is why we all have the potential to be genetic lottery winners, because a forgetful genome can be retrained. NANO POLICOSANOL is retraining the forgetful genome in all of us!.

NANO POLICOSANOL Improves Immune System:

NANO POLICOSANOL assists in improving the immune system, enhancing wound healing, stimulating cell regeneration and promoting healthy energy levels.

This nano-emulsion of policosanol—a substance derived from naturally occurring plant waxes known as long-chain lipid alcohols is nano encapsulated to 60 nanometers.

ADVANTAGES OF NANO POLICOSANOL:

- NANO POLICOSANOL contains policosanol nanoparticles with size less than 60nm. It can penetrate through all organs, get into the cell

nucleus, regulate genes and is more effective in improving human health.

- NANO POLICOSANOL enables the human body to increase Vitamin C endogenously without taking any vitamin C supplements. This helps to reduce the risk of diseases associated with Vitamin C deficiency.
- NANO POLICOSANOL IMMUNE SPRAY expresses more than 260 genes that are also known to be produced in the brain and can help to improve the condition of people with brain related health problem such as stroke and Parkinson's disease.
- NANO SPRAY is very effective in enhancing wound healing (including diabetic wounds, cut and burn), in repairing damaged organs and blood vessels, and in healing skin diseases.
- NANO IMMUNE SPRAY helps to improve longevity through multitude avenues. It only takes one successful road to longevity to make NANO POLICOSANOL a Great Invention of Mankind.
- NANO POLICOSANOL serves as the best anti-microbial agent against many viral and bacterial infection and NANO POLICOSANOL also reduces inflammation and pain of the joints and muscles.

FUNCTIONS OF NANO POLICOSANOL:

- ✓ Provides therapeutic effects of vitamin D3
- ✓ Restores proper immune functions
- ✓ Increases Vitamin C, Adiponectin and Testosterone levels
- ✓ Inhibits TNF- α and NF- κ B

- ✓ Regulates thousands of human genes
- ✓ Reduces inflammation and pain
- ✓ Enhances wound healing
- ✓ Defends against viruses and bacteria
- ✓ Increases energy level & cognitive function
- ✓ Relieves itchy eyes and itchy skin
- ✓ Rejuvenates healthier and youthful skin
- ✓ Regulates abnormal biomarkers
- ✓ Repairs damaged blood vessels and organs
- ✓ Corrects the underlying health problems
- ✓ Improves longevity and anti-aging

NANO POLICOSANOL (US patent 8,722,093) is a nano emulsion of long-chain alcohols found in many foods.

It is commonly called policosanol and is present in foods such as rice, sugar cane, wheat and peanuts.

NANO POLICOSANOL acts on nuclear vitamin D receptors (VDR) (US patent 9,006,292) that are present in cells throughout the body to stimulate the immune system and inhibit a variety of disease processes.

NANO POLICOSANOL is an extract of policosanol, a combination of long chain aliphatic alcohols. This ingredient is found in many foods, including broccoli, wheat, sugar cane, sorghum, distiller's grain, apples, peanuts. Indeed, many are seeds that we consume every day.

It has been made into a nano-emulsion, which acts on nuclear receptors (NR) which are present in the nucleus of each and every cell and contains software necessary for Homeostasis. By virtue of their abilities to regulate a myriad of human developmental and physiological functions (reproduction, development, and metabolism), nuclear receptors have been implicated in a wide range of diseases, such as cancer, diabetes, obesity, etc.

Rudolf Virchow, the father of pathology, wrote, "All diseases are reducible to passive or active disturbances of cells". This view was echoed in 1925 by the eminent geneticist and cell biologist E.B.Wilson whom stated, "The key to every biological problem must finally be sought in the cell.

This is what **NANO POLICOSANOL**® is designed to do.

It can be a little hard to visualize how our bodies respond to this extraordinary gift to humanity, and be clear this is a nutritional supplement, not a medicine. And this is the key to understanding

NANO POLICOSANOL - how our bodies respond. Suddenly our bodies can deal naturally with the vast array of pathogens that have compromised the immune system, including previously incurable illnesses and diseases. Also, our body recovers its ability to heal its genetic code. One outcome is the recovery of the ability to naturally produce its own Vitamin C, an ability also

missing in primates and guinea pigs. All other animals can. Suddenly our bodies have levels of natural Vitamin C that we could NEVER get through supplementation alone, and it is fully compatible with our bodies.

Also, the shortening of the telomere, which occurs as our cells divide and is the key element in our ageing process, stops and reverses. The developer of NANO POLICOSANOL told me he is 68 years old and with a biological age of 51 because he has been using NANO POLICOSANOL for almost 10 years. **He is getting biologically younger** one year each year!!!

And this is just the beginning. All through food components that are completely natural and part of our everyday diets, packaged in a special way.

NANO POLICOSANOL IMMUNE SPRAY BENEFITS

Vitamin C

Some mammals (including humans) are not able to produce Vitamin C. Vitamin C is an antioxidant that neutralizes harmful free radicals. It makes collagen tissues and is essential for healthy bones, teeth, gums, blood vessels, immune function and wound healing. NANO POLICOSANOL enables the human body to increase Vitamin C endogenously without taking any vitamin C supplements. This helps to reduce the risk of diseases associated with Vitamin C deficiency.

Vitamin D3

Due to modern lifestyle, most people are not getting sufficient Vitamin D from sun exposure and have a compromised immune system. Vitamin D deficiency is linked to more than 400 diseases. By binding to Vitamin D Receptors (VDR), NANO POLICOSANOL serves as a substitute for Vitamin D3 and helps to restore proper immune functions and improve overall health.

Human Genes

In gene analysis, NANO POLICOSANOL is found to regulate more than 2300 human genes. By up-regulating (activating) and down-regulating (inhibiting) certain genes, NANO POLICOSANOL can affect a wide range of disease processes. For example, NANO POLICOSANOL expresses more than 260 genes that are also known to be produced in the brain and can help to improve the condition of people with brain related health problem such as stroke and Parkinson's disease.

Microbial Species

In independent studies, NANO POLICOSANOL inhibits a wide range of microbial species of viruses, bacteria, fungi, yeast and parasites. This includes Zika, Dengue, Ebola, Marburg, Influenza A (H1N1), Chikungunya, Human Respiratory Syncytial, Adenovirus, Tacaribe Mammarena, Rift Valley Fever, SARS Coronavirus, Japanese Encephalitis, West Nile, Yellow Fever, Staphylococcus Aureus, Pseudomonas Aeruginosa, Escherichia Coli, MRSA, Syphilis,

and many others. By improving the immune defense system, NANO POLICOSANOL serves as the best anti-microbial agent against many viral and bacterial infection.

Blood Vessels Repair

A stem cell can become any one of the 220 different cells in the body. In cord blood studies, NANO POLICOSANOL has demonstrated the ability to produce our body's own pluripotent stem cells. As a results, NANO POLICOSANOL is very effective in enhancing wound healing (including diabetic wounds, cut and burn), in repairing damaged organs and blood vessels, and in healing skin diseases.

Reduces Pain

When there is an imbalanced in certain key proteins and hormones in our body, we can get sick. For example, a high level of NF- κ B, TNF- α and ICAM-1 proteins, a low level of adiponectin protein, and an abnormal level of PA1-1 and MCP-1 proteins can lead to many diseases. NANO POLICOSANOL helps to regulate the level of these proteins and different hormones (including TSH and Testosterone) and help to lower the risk of many diseases. NANO POLICOSANOL also reduces inflammation and pain of the joints and muscles.

Improves Anti Aging

By improving the immune system, increasing vitamin C level, regulating human genes, serving as an effective anti-microbial agent, reducing the risk of contracting chronic diseases, and corrects for abnormal biomarkers and underlying health problems, NANO POLICOSANOL helps to improve longevity through multitude avenues. It only takes one successful road to longevity to make NANO POLICOSANOL a Great Invention of Mankind.

Supplement Facts:

Supplement Facts:

Serving size: 6 sprays in mouth once a day

Amount per serving

| | | |
|-------------|----------|--|
| | | |
| Water | 806.3 mg | |
| Policosanol | 4.2 mg | |

| | | |
|---|---------|--|
| TPGS Vitamin E | 16.7 mg | |
| Sucrose Ester | 4.2 mg | |
| Citric Acid Monohydrate | 2.1 mg | |
| Contains no sugar, milk, egg, peanuts, yeast, gluten, artificial colors, flavors or sweeteners. | | |

BENEFITS

YOUR HEALTH & LONGEVITY

- Policosanol Nanoparticles in liquid formulation
- Serves as a natural Vitamin D substitute
- Modulates the immune system
- Reduces inflammation and pain
- Provides antiviral and antibacterial protection
- Enhances wound healing
- Repairs damaged blood vessels and scar tissues
- Increases cognitive function
- Assists cardiovascular health
- Corrects the underlying health problems
- Improves longevity and reverse aging
- Regulates abnormal biomarkers

Usage for health maintenance

Adults 18+ : 6 or more sprays in mouth one or more times a day
 Ages 6-17 : 3 sprays in mouth once a day or more
 Ages 0-5 : 2 sprays in mouth once a day

More Detailed Information

NANO POLICOSANOL Spray is a nano emulsion of policosanol formulated in water. It is a natural, non-toxic food product that has no known side effects. It is manufactured using nano-technology in an FDA approved facility in Switzerland. The key ingredients are policosanol from rice bran, vitamin E and water. All ingredients are classified by US FDA as a GRAS (generally regarded as safe) product. NANO POLICOSANOL binds to vitamin D receptors on immune cells throughout the body to stimulate the immune system and inhibit a variety of disease processes. In independent lab tests, NANO POLICOSANOL has demonstrated the ability to inhibit Zika, Dengue, Ebola, H1N1, SARS, West Nile, Yellow Fever and many other deadly viruses. The benefits of NANO POLICOSANOL Spray includes improving the immune and physiological functions, minimizing the side effects of drugs, defending against bacterial and viral infection, performing gene transcription, repairing damaged blood vessels, skin tissues and organs, correcting for abnormal biomarkers and underlying health problems, and improving longevity.

Each spray of Nano-OJAS pray contains more than a quintrillion (10¹⁸) of Policosanol nanoparticles. These infinitesimal particles with size less than 60 nm can penetrate through skin tissues, get into the blood stream, get to all cells in the body, bind to vitamin D receptors, get into the nucleus of cells, regulate the genes and improve the immune system.

Most health products in the market have particle size larger than 600 nm, they can easily get trapped in the organs. Even if they can get to the cells, their particle size is too large to get into the nucleus. Therefore, they are not effective in activating the cells and improving human health. NANO POLICOSANOL contains policosanol nanoparticles with size less than 60nm. It can penetrate through all organs, get into the cell nucleus, regulate genes and is more effective in improving human health.

Due to modern lifestyle, most people are not getting sufficient Vitamin D from sun exposure and have a compromised immune system. Vitamin D deficiency is linked to more than 400 diseases. By binding to Vitamin D Receptors (VDR), NANO POLICOSANOL serves as a substitute for Vitamin D3 in deficiency and helps to restore proper immune functions and improve overall health.

Some mammals (including humans) are not able to produce Vitamin C. Vitamin C is an antioxidant that neutralizes harmful free radicals. It makes collagen tissues and is essential for healthy bones, teeth, gums, blood vessels, immune function and wound healing. NANO POLICOSANOL enables the human body to increase Vitamin C endogenously without taking any vitamin C supplements. This helps to reduce the risk of diseases associated with Vitamin C deficiency, such as scurvy. To optimize vitamin C function it does need to be physically consumed as well.

In gene analysis, NANO POLICOSANOL is found to regulate more than 2300 human genes. By up-regulating (activating) and down-regulating (inhibiting) certain genes, NANO POLICOSANOL can affect a wide range of disease processes. For example, NANO POLICOSANOL expresses more than 260 genes that are also known to be produced in the brain and can help to improve the condition of people with brain related health problem such as stroke and Parkinson's disease.

In independent studies, NANO POLICOSANOL **inhibits** a wide range of microbial species of viruses, bacteria, fungi, yeast and parasites. This includes Zika, Dengue, Ebola, Marburg, Influenza A (H1N1), Chikungunya, Human Respiratory Syncytial, Adenovirus, Tacaribe Mammarena, Rift Valley Fever, SARS Coronavirus, Japanese Encephalitis, West Nile, Yellow Fever, Staphylococcus Aureus, Pseudomonas Aeruginosa, Escherichia Coli, MRSA, Syphilis, and many others. By improving the immune defense system, NANO POLICOSANOL serves as the best anti-microbial agent against many viral and bacterial infection.

A stem cell can become any one of the 220 different cells in the body. In cord blood studies, NANO POLICOSANOL has demonstrated the ability to produce our body's own pluripotent stem cells. As a result, NANO POLICOSANOL is very effective in enhancing wound healing (including diabetic wounds, cut and burn), in repairing damaged organs and blood vessels, and in healing skin diseases.

When there is an imbalance in certain key proteins and hormones in our body, we can get sick. For example, a high level of NF- κ B, TNF- α and ICAM-1 proteins, a low level of adiponectin protein, and an abnormal level of PA1-1 and MCP-1 proteins can lead to many diseases. NANO POLICOSANOL helps to regulate the level of these proteins and different hormones (including TSH and Testosterone) and help to lower the risk of many diseases. NANO POLICOSANOL also reduces inflammation and pain of the joints and muscles.

It is an older molecule than the first cell, and when it shows up, it is like the Godfather, and says, “you know what to do, now do it!!!” And they do. It is A brilliant universal primordial illuminating light that reveals every compromising toxic and infectious element to the cell’s consciousness, which once awakened to the noxious element’s presence, then sweeps them out, in order to restore their God driven elegant healthy functioning.

By improving the immune system, increasing vitamin C level, regulating human genes, serving as an effective anti-microbial agent, reducing the risk of contracting chronic diseases, correcting for abnormal biomarkers, and underlying health problems, NANO POLICOSANOL helps to improve longevity through multitude avenues. It only takes one successful road to longevity to make NANO POLICOSANOL a Great Invention of Mankind.

NANO POLICOSANOL is all about a journey from HEALTH SCARE to HEALTH CARE to SELF CARE

[Nano Policosinol should be a part of every health regime...Bill]
